

**We've installed severe weather alert devices at each of the city's youth sports venues. If lightning is detected within 8 miles of a device, it will flash a light, sound a 15-second siren and then play an audible message explaining the approaching weather. A 30-minute countdown will then begin before the all-clear is issued.**

**Veterans Park, Municipal Park, Buck Creek Park, Warrior Park and Larry Simmons Stadium are now equipped with these devices, and they will only be active during park hours.**

**It's just another way we're working to ensure families have a safe, enjoyable experience at our sports facilities!**
